

## AP Psychology Summer Assignment

Printed Name: \_\_\_\_\_

Welcome to AP Psychology! Let's just get to the point, shall we?

1. PRINT THIS ENTIRE DOCUMENT.

2. Go here:

<https://www.macmillanlearning.com/studentresources/highschool/hsbridgepage/myersap3e.html>

I do not believe that registration is necessary. This should lead you to a site that has a bunch of online resources that you might find helpful while navigating the class. Look around. Watch a video or two. Have some fun.

3. For your copy of a book to utilize, you will be granted electronic (e-book) access, via LaunchPad, and need to consider which type of electronic format (laptop, phone [which are not allowed to be used in the classroom], tablet, etc.) suits your needs best. Regardless of your choice, please consider screen size, as too small of a screen size will leave you with both a tactile and visual disadvantage. We will be utilizing the 3<sup>RD</sup> EDITION this year. I will give you your book code information in class in the fall.

Here is the proper reference for the book that we will be using (administered in E-book format):

Myers, D.G. (2018). *Myer's Psychology for the AP Course*. New York: Worth Publishers. ISBN-10: 1-319-07050-7  
ISBN-13: 978-1-319-07050-2

There are PDF versions of this book that can be found online. I cannot tell you where. Google it.

4. Complete the 170-question True/False assignment which is designed to introduce you to the vast field of psychology. Print it out single-sided and answer the questions. Staple quizzes *in order*. **This assignment is to be completed by the first day of school and turned in to me on the first day of attendance\*. Failure to do so will result in the student being automatically withdrawn from the course. In other words, DON'T leave it at home (or wherever).** Relax: it's true/false. You should be able to find all of the answers on the internet. This assignment is not designed to be difficult. It is designed to introduce you to a very large field that covers a lot of topics that the average student has no idea is actually related to the field of psychology. So read the questions and learn a thing or two. If

your complaining already, or if you are the type of student to not do all of your own work, then my class is not for you—trust me.

5. Go here: <https://apcentral-y2ffarwztd04mxuwfj25nrfrvo-origin.collegeboard.org/courses/ap-psychology?course=appspsychology> This site will have everything that you need to know about the AP Psychology Exam.
6. Go to Education Planner online: <http://www.educationplanner.org/students/self-assessments/index.shtml> and do the following self-assessments: *What's Your Learning Style?* and *Which Study Habits Can You Improve?* Print out two copies of the results of both assessments and print your name on them and turn in one copy to me. **This is due the very first day that you attend my class.**
7. Read the statement below and sign and date.

I look forward to meeting you in August. Until then, please know that I am already praying for you and your future success in this class. All my best for a wonderful summer.

Professor Kerns  
[c.kerns@tka.net](mailto:c.kerns@tka.net).

\* If a student enrolls in the class during the week prior to or the first week of classes, he or she will be given two weekends to complete the assignment, and will turn the assignment in the first day of school after the second weekend. Failure to do so will result in withdrawal from the class.

I understand that AP Psychology is an Advanced Placement course, and, as such, will require a great deal of self-motivation and effort. By signing this document, I am: verifying that I have completed the above assignments; attesting to my understanding that an AP course is a college-level course; agreeing to rise to the demands of an AP course; and give my very best to negotiate this course successfully—and will do so without whining.
